

Best Execution Policy

1. Introduction

This policy summarizes the arrangements **Global View International Services Ltd incorporated in Saint Vincent and the Grenadines** (hereinafter referred to as “the Company”) Directives to meet the company’s obligations and take all reasonable steps to obtain the best possible result for its clients when receiving and transmitting orders for execution in relations to financial instruments. All clients are advised that trading Binary Options can carry a high level of risk and may be not suitable for all investors. Clients could lose all their initial investment. The risks must be understood prior to trading.

2. Scope and Application

The Purpose of this policy is to ensure that appropriate policies or arrangements are effectively implemented by **Global View International Services Ltd** when receiving and transmitting or executing client orders for all financial assets offered by the company

The company provides only Binary Options trading through its platform.

This policy applies to both Retail and Professional clients. In case that a client is classified as an Eligible Counterparty, this policy does not apply to that client.

3. Best Execution Criteria

Global View International Services Ltd will take into account the following criteria when determining the relative importance of the best execution factors:

- The characteristics of the client including whether the client is retail or professional.
- The characteristics of the client order.
- The characteristics of the financial instrument that is the subject of that order.
- The characteristics of the execution venues to which that order can be directed.

For Retail clients **Global View International Services Ltd** will determine the best possible result in terms of the total consideration by taking into account the price of the financial instrument and the costs directly related to execution, including clearing and settlement fees and any other fees paid to third parties involved in the execution of the order.

4. Best Execution Factors

Global View International Services Ltd has in place a policy and procedures which are designed to obtain the best possible execution result on a consistent basis, subject to and taking into account the following factors:

a) Price

Global View International Services Ltd considers pricing as a matter of highest importance for best execution, and receives its prices from 4 to 6 well-known and reliable independent price providers (including Reuters). All the trading prices are presented electronically through the company's online trading platform. The company takes all the appropriate measures to ensure that its prices are accurate and competitive enough and it evaluates its pricing providers on a yearly basis.

Global View International Services Ltd provides its clients with more than 470 assets and expiries for a period of 30 sec up to 1 year.

b) Costs

Clients are not charged any commissions or fees by the Company for any Transaction executed unless agreed otherwise by the Parties hereto. Leverage is not offered to any clients.

There is also a \$10 a month inactivity fee which will be charged to each client whose account is inactive for a period greater than 3 months. Activity, in this sense, is a client logging in to their trading account. The fee will be deducted directly from each client's trading account, from their available balance. To avoid this \$10 inactivity fee a client must log in to their trading account at least once every three (3) months.

c) Speed of Execution

Global View International Services Ltd is not an execution venue. When a client opens a position, the order is received by Global View International Services Ltd and is automatically routed to its execution venue. The company will ensure that the third party execution venue is contracted to providing clients with best execution.

Speed of execution is dependent on market conditions and communications links. I.e. A poor internet connection or dial up connection could have an effect on the speed of pricing updating and may delay the execution of an order.

d) Likelihood of Execution

There could be specific cases where the execution of order may not be possible. This could happen when there is high volatility in the market or when there is a lack of available prices, or during a system failure. Moreover the company will not execute any client's order who try to abuse or manipulate the system, and the company has sole discretion to take any measures it deems fit and appropriate under the said circumstances.

e) Likelihood of Settlement

It is possible a contract is closed prior to expiration or the time of expiration. **Global View International Services Ltd** carries on with the settlement of all transactions.

f) Order Size

The size of each order is dependent on that client's available balance, and price availability. In case that a client attempts to open an order that needs more capital than the available equity in their account, the system will automatically reject the order.

g) Abnormal Market Conditions

It is possible for factors other than the above to affect trading prices. The company will undertake all the appropriate measures to obtain the best possible executions results for its clients.

5. Specific Instructions

In cases when there is a specific instruction from a client, the company must execute the order in accordance with those instructions and does not need to apply the best execution provisions in relation to those matters that the instruction specifies. However the best execution requirements must still be applied to those parts of an order not covered by the specific instruction.

6. Execution of Client Orders

Clients enter their Orders via the internet by using the web-platform or the mobile application.

Global View International Services Ltd when carrying out Clients Orders tries to satisfy the following conditions:

- a) Ensures that orders executed on behalf of clients are promptly and accurately recorded and allocated.
- b) Carries out otherwise comparable client orders sequentially and promptly unless the characteristics of the order or prevailing market conditions make this impracticable, or the interests of the client require otherwise.
- c) Informs a retail client about any material difficulty relevant to the proper carrying out of orders promptly upon becoming aware of the difficulty.

7. Execution Venues

Execution venues are the entities that the Company uses to execute clients orders. Novotick is the execution venue that **Global View International Services Ltd** uses for executing its client's orders. Clients should be aware that they are exposed to higher risk as all Binary Options contracts are traded on the OTC markets, as opposed to regulated exchanges.

8. Monitoring

Global View International Services Ltd will review its order execution arrangements regularly in order to identify any inadequacies and ensure that **Global View International Services Ltd** achieves execution on a consistent basis in relation to this policy.

As part of the dealing/brokerage desk we create and monitor risk management parameters to ensure that traders' own risk is rather limited, and traders' risk to other traders is limited as well.

This Best Execution Policy is reviewed annually and every time a material change occurs that could affect its ability to obtain the best possible result for the execution of orders. The company reserves the right to review or amend its policy and arrangements without notice to the client.

9. Clients Consent

Global View International Services Ltd is required to obtain clients' consent to its execution policy. By accepting the **T&C**, Clients acknowledge and accept that they have read and understood the "Best Execution Policy" of the Company, which is available for examination on the Company's website under the heading "LEGAL".

For any additional information concerning the best execution policy, clients should contact **Global View International Services Ltd.**
